# How to avoid a learning lockdown online

Creativity, Innovation and Digitalisation at the interface between
education, volunteering and business.

Dear colleague,

It is our pleasure to invite you to the 10th REVEAL conference, this year
hosted by the consortia of the projects CIM, PITCH and Job Bridge
on December 10th and 11th, 2020.

Accelerated digitalisation has brought challenges and oppor-
tunities for activities in all sectors. How can we foster the
visual, swift and expansive potential of online tools whilst
preserving the collaborative, creative and social prospects
that face to face interactions provide? How could those
innovative digital formats contribute to solving some of the
issues caused by the COVID-19 crisis?

These are the questions addressed by 10th REVEAL conference. This year we will bring together
professionals from formal and informal education, businesses, chambers, NGOs, National
Agencies, the EACEA, volunteers and students from all over Europe to focus on new approaches
to embed creative, innovative and digitally supported learning approaches in various educational
contexts.

The 10th REVEAL conference is organised as 2-day online event, giving you the chance to
experience innovative digital conferencing and networking formats within our projects and
communities. There will be keynotes, interactive collaboration formats and appropriate
opportunities for informal meetings, exchange and social moments. In the evening session we
will also offer intercultural online encounters to make this year's conference a great experience
for you!

The conference comes with a virtual exhibition, meeting and networking spaces for students,
volunteers and enterprises and development workshops for ERASMUS projects in the new
funding period.

Again, you may win the my-VITA award for the most creative and innovative learning project and
pitch in front of 120 experts from all over Europe.

We are looking forward to welcoming you in December!
